## Organic rice and spelt syrup

At the production of our rice- and spelt syrup the natural properties are kept as much as possible and the originality of the product guaranteed. After grinding the rice and spelt grains, hydrolysis follows. The flour is mixed with water, heated up and natural enzymes are added to break down the flour's starch molecules. It is then filtered to separate the juice from the insoluble substances. The filtering uses no technical and chemical substances to ensure maximum retention of the nutrients and the syrup's specific properties. Heating removes the excess water from the juice to make our delicious syrups!

### • Spelt syrup

The ancient grain spelt has a characteristic and sweet taste. This unrefined syrup is a good sweetener for hot or cold meals or pancakes, for instance. Suitable for vegetarians and vegans. Contains gluten.

### • Rice syrup

A mild and sweet taste. The syrup is a good sweetener, e.g. in cakes and pastry-baking or in desserts or hot drinks. Unrefined and naturally gluten-free. Suitable for vegetarians and vegans.
